Summary

I'm a Product Manager with a background in design. I approach product as a user first and a builder second, drawn to spaces where there's no established playbook and the rules are still being written. I spent four years co-founding and building Dream, leading a team of 10 to take a consumer fintech platform from 0 to 1.

Experience

Dream - Cofounder, Product Manager

Apr 2022 – Feb 2026 | New York City

- Co-founded and raised \$3M+ to build a consumer fintech trading platform from 0 to 1
- Grew a closed beta from \$0 to \$50m in volume and 5,000+ users with zero paid acquisition, reaching 4% of the market leader's volume
- Owned the product surface end to end: PRDs, roadmap, engineering handoff, and release QA across iOS and Web
- Created the design system and component library spanning both platforms that 5+ designers and external studios relied on daily
- Established user research processes and data pipelines to drive continuous product iteration
- Led partner relationships and external collaborations across design, engineering, and infrastructure

Skills

- Figma, Visual Design, Brand Design, Adobe Suite
- Linear, Trello, Notion
- Claude Code, Cursor, React, React Native, Git

Domain Experience

- Consumer fintech, Prediction Markets, Perpetual futures, Options & derivatives trading
